

Chemical Safety App

Dealing with chemicals can be a very hazardous situation, unless you deal with them properly. Thousands of people are injured from chemicals every year due to people handling them improperly. No matter what type of job you are doing, an accident and injury from chemical exposure can happen in many different workplace settings

CAMEO Chemicals is a database of hazardous chemical datasheets that emergency responders and planners can use to get response recommendations and predict hazards (such as explosions or toxic fumes). CAMEO Chemicals is developed jointly by the National Oceanic and Atmospheric Administration (NOAA) Office of Response and Restoration in partnership with the Environmental Protection Agency (EPA) Office of Emergency Management. It is one of the core programs of the CAMEO software suite

Available on both Apple and Android devices
