

SAFEDRIVE APP

Drive. Earn. Play.

DRIVE

The Release button

Once you exceed 6 mph the SafeDrive algorithm will start awarding you points. The "Release" screen is designed to be boring. It helps you drive safely without distractions.

DRIVE

Release

Pressing the Release button will result in losing the points you made that trip. Our app will double check if that is what you want. We hope you will always press the No button, in order to drive safe and earn all the points you can.

DRIVE

Finished trip

Whenever your speed is under 6 mph the screen shows the number of points earned. When you arrive at your destination, the points will be added to your account.

Drive safe, earn more.

EARN

Marketplace

Your total number of earned points is always visible on the homescreen. Anytime you wish, use your points on discounted products offered by responsible companies. Spend them wise in the SafeDrive Marketplace

PLAY

Challenge result

The highest best trip wins, therefore drive as safe as possible in order to win a percentage from the total number of your opponent's total points.
